

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1 Claim 1 (currently amended): A method for logging
2 information during a call completion process in an Internet
3 call waiting environment comprising the steps of:
4 creating a service detail record comprising a
5 plurality of parameters, wherein each of the parameters
6 relates to management information associated with the call
7 completion process; and
8 assigning a value to each of the parameters ~~a~~
9 ~~parameter~~ of the service detail record.

1 Claim 2 (currently amended): The method according to
2 claim 1, whereby the value of each ~~said~~ parameter of the
3 service record is based on call related information.

1 Claim 3 (currently amended): The method according to
2 claim 2, whereby said call related information is a unique
3 id field, an A-number, a B-number, an A-number
4 presentation, or an originally dialed number.

1

2 Claim 4 (currently amended): The method according to
3 claim 1, whereby the value of each ~~said~~ parameter of the
4 service record is based on information relating to the call
5 completion process.

1 Claim 5 (currently amended): The method according to
2 claim 4, whereby said call completion related information
3 is a start of a pop-up, a start of an outgoing call, a
4 status, a choice, a pop-up choice, or a time out.

1 Claim 6 (currently amended): The method according to
2 claim 1, whereby the service detail record is created at
3 the beginning of the call completion process.

1

1 Claim 7 (currently amended): The method according to
2 claim 4, whereby a timer is started, and ~~the~~ a value of
3 said timer is logged in the service detail record on a
4 point of time during the call completion process.

1

Claims 8-11 (cancelled).

1

1 Claim 12 (new): The method according to claim 1, further
2 comprising the step of providing the service detail record
3 to an Internet call waiting service provider, wherein the
4 service detail record serves as a measure of performance of
5 the Internet call waiting service.

1

1 Claim 13 (new): A system, comprising a server, wherein the
2 server stores and maintains an application for logging
3 management information during a call completion process in

4 an Internet call waiting environment, wherein the
5 application comprises a plurality of components, wherein
6 the plurality of components perform the following
7 functions:

8 creating a service detail record comprising a
9 plurality of parameters, wherein each of the parameters
10 relates to the management information associated with the
11 call completion process; and

12 assigning a value to each of the parameters of the
13 service detail record.

1
1 Claim 14 (new): The system according to claim 13, further
2 comprising a user device that communicates with the server
3 via a network.

1
1 Claim 15 (new): The system according to claim 14, wherein
2 the network is a mobile network.

1
1 Claim 16 (new): The system according to claim 14, wherein
2 the network is a fixed network.

1
1 Claim 17 (new): The system according to claim 14, wherein
2 the device is selected from the group consisting of a
3 personal computer and a mobile phone.
